PROFILE

Senior PHP developer with a passion for automation and system optimization. Experienced in full-stack development, DevOps practices, and infrastructure management. Currently deep into DevOps and AI tooling — building smarter pipelines and experimenting with new ways to improve how teams work. Dedicated to learning, sharing, and helping others make technology a little more efficient and fun.

EXPERIENCE

PBA

Jul 2019 – Present

Operations Manager

2025 – Present

- Leading operational strategy and managing cross-functional teams
- Driving efficiency improvements through automation and AI-assisted tooling

DevOps Engineer

2021 – Present

- Designed and maintained CI/CD pipelines using GitLab CI/CD
- Managed Kubernetes clusters, Docker containerization, and GCP infrastructure
- Implemented monitoring, logging, and security hardening across production environments
- Administered servers, SSL certificates, VPN setups, and PostgreSQL databases

Senior Developer

2020 – 2024

- Led full-stack development projects using PHP, JavaScript, and modern frameworks
- Mentored junior developers and contributed to team growth and code quality standards
- Developed business analytics tools and internal systems for customer insights

Junior Developer

Jul 2019 – 2020

- Built and maintained web applications in PHP
- Collaborated with senior developers on feature development and bug fixes

Raya Afzar Sayeh — PHP Developer

Nov 2018 – Jul 2019

- Developed and maintained web applications using PHP
- Worked on backend services and database integration

EKN Startup — Python & Arduino Developer, Smart Home & IoT

Dec 2017 – Mar 2018

- Developed IoT solutions using Python and Arduino for smart home systems
- Prototyped and tested hardware-software integrations

iGO Studio — Founder, Developer & System Admin

Jul 2015 – Mar 2019

- Founded and managed a development studio handling web projects and system administration
- Delivered end-to-end solutions from development to server deployment and maintenance

TECHNICAL SKILLS	Languages	PHP, JavaScript, Python, Bash, Swift
	DevOps & CI/CD	GitLab CI/CD, Docker, Kubernetes, GitHub Actions
	Cloud & Infra	GCP, Linux server administration, networking, VPN
	Databases	PostgreSQL, MySQL, Redis
	Tools & Platforms	Git, Nginx, Apache, SSH, SSL/TLS
	Security	System hardening, firewall configuration, access control
	AI & Automation	AI-assisted development tools, pipeline optimization

LANGUAGES	Persian — Native	English — Full working proficiency	Turkish — Elementary
-----------	------------------	------------------------------------	----------------------

INTERESTS & LEARNING	Site Reliability Engineering — actively studying and applying SRE principles	Artificial Intelligence — exploring AI as a tool for development and operations
	Privacy & Security — building secure, privacy-respecting systems	Networking & Data — deepening expertise in network architecture and data systems
	Philosophy — the intersection of technology and human thought
